

What we have heard

- Why CECs are of concern to State of California
 - Data needs by State Water Board and Ocean Protection Council to support CEC management
- Findings and recommendations by CEC Expert Panel
 - Occurrence data: studying, addressing, interpreting, and improving
 - Framework to handle prioritization of CECs based on existing occurrence and new information
 - Role of State agencies for monitoring
 - Oversight of prioritization process
- Response of State to Panel recommendations
 - Improve data, refine prioritization, fill data gaps, work with partners, address effect of CEC lifecycle on management needs for State Water Board and beyond

Next steps

- Final Panel report to be released soon
 - Incorporate comments from public review period
 - Will be available at State Water Board website
https://www.waterboards.ca.gov/water_issues/programs/cec/non_drinking_water.html
 - Also SCCWRP website <https://www.sccwrp.org/about/research-areas/emerging-contaminants/cec-ecosystems-panel/>
- Presentations and recording of this webinar will be available at SCCWRP website
- Thank you for your interest!
