

# PROPOSED DECEMBER AGENDA ITEMS

- **You asked for a CEC theme**
  - Technology transfer of bioanalytical screening tools
  - Pilot testing results from application of CEC monitoring tools in receiving waters
  - Update on the CEC Expert Panel for ambient discharge
- **You also asked for a bioassessment/biostimulatory science and regulatory update**
  - Specifically calling out the San Diego Water Board's proposed Basin Plan amendment and their incorporation of biological objectives
- **Suggest adding a presentation on the West Coast Ocean Alliance Report Card recommendations**

# AGENDA PLANNING FOR 2020

- **You moved several years ago to year-ahead agenda planning**
- **We have used a three step process to develop those agendas**
  - Gather agenda item suggestions from you and CTAG between now and November
  - Have you vote in November via email for your preferred topics
  - Show the voting results and suggested agendas for the year at your December meeting
- **What you decide in December is guidance, not gospel**
  - The Commission Chair and Vice Chair still have flexibility to adjust during the year
- **Would you like to continue using that agenda planning process?**

# THREE TYPES OF TOPIC AREAS

- **CTAG topics**
  - CTAG focuses their meetings around a research theme
  - The Commission typically hears a science update about the topic area that CTAG focuses on in their meeting
- **SCCWRP science related to timely management issues**
  - Topics intended to catalyze Commission discussions early in the evolution of management decisions
  - Your discussion helps focus SCCWRP its research to support management decisions
- **Briefings about emerging issues**
  - Leveraging SCCWRP's scientific knowledge to inform the Commission about up-and-coming issues of management relevance.
  - Not necessarily oriented around SCCWRP research
