

Water Boards Presentation Overview

Today
Oct. 12, 2020

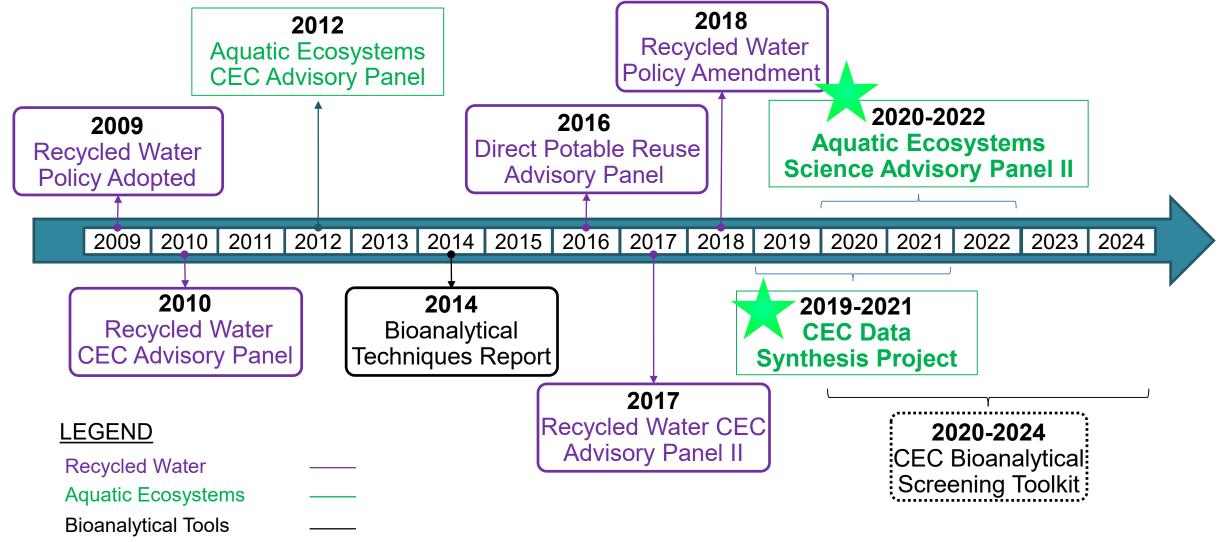

- Developing a statewide CEC Program
- Programmatic challenges
- Program recommendations

Tomorrow Oct. 13, 2020

 State and Regional Water Boards success and challenges with implementation of 2012 CECs in Aquatic Ecosystems Panel Recommendations

State Water Board CEC Science Advisory Panels and Projects

Water Quality, Water Resiliency, and Protecting

CA's Aquatic Ecosystems

Santa Ana Colorado River

Maintain and Diversify Water Supplies

Be prepared for climate change

Flexible and integrated water management

1,609 miles of shoreline

200,000 miles of rivers

1.6 M acres of lakes and reservoirs

 645,000 acres of estuaries, harbors, and bays

275,000 acres of wetlands

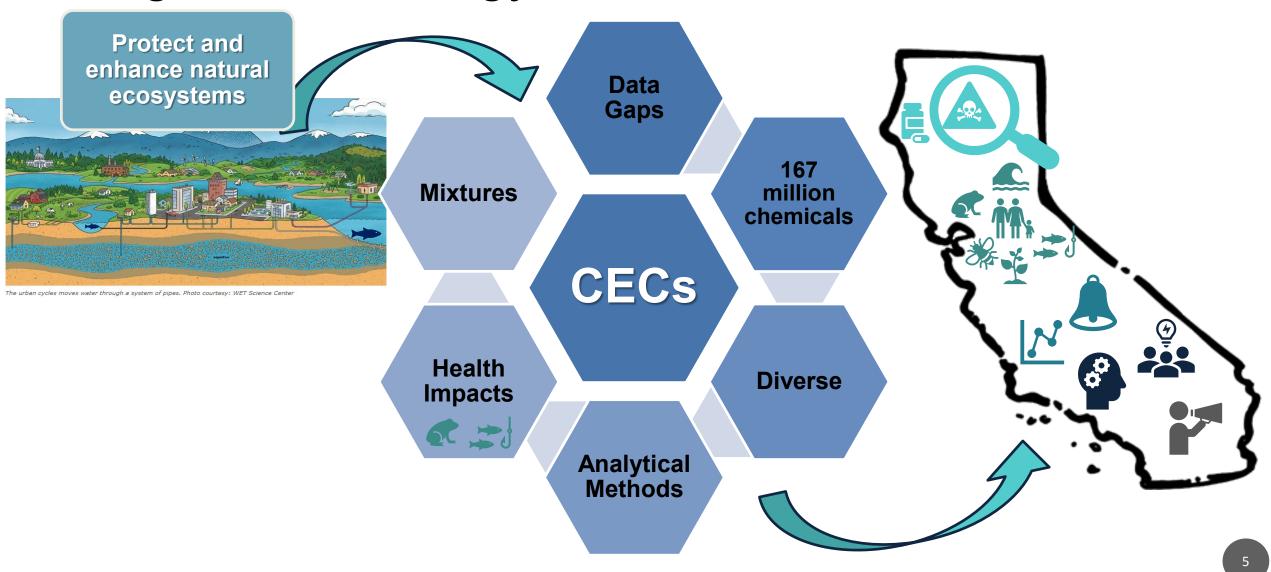

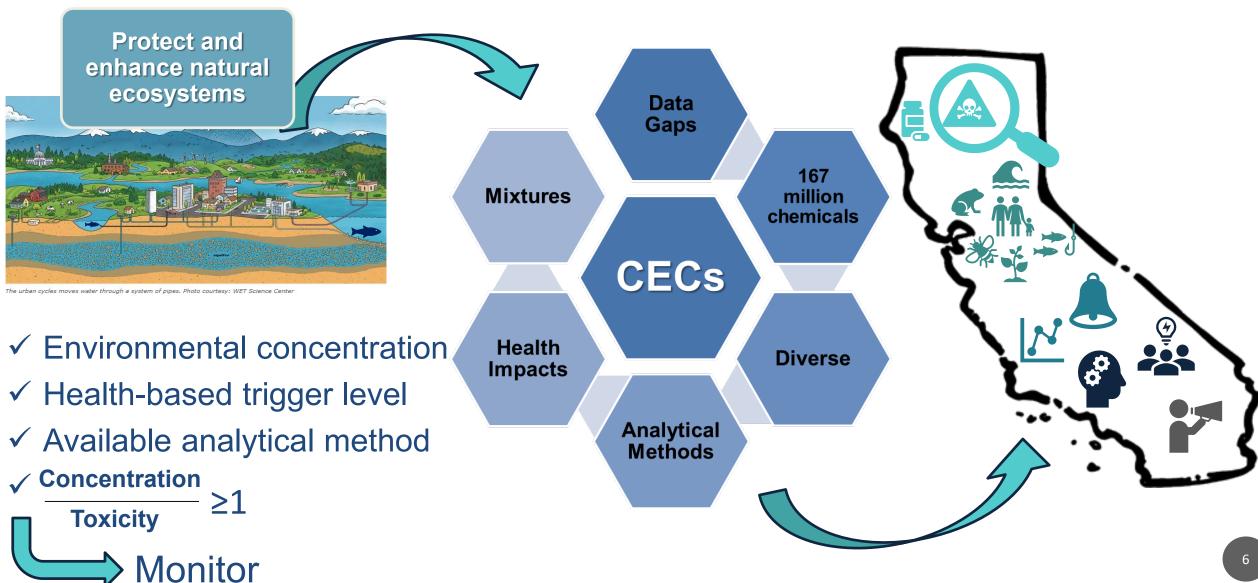

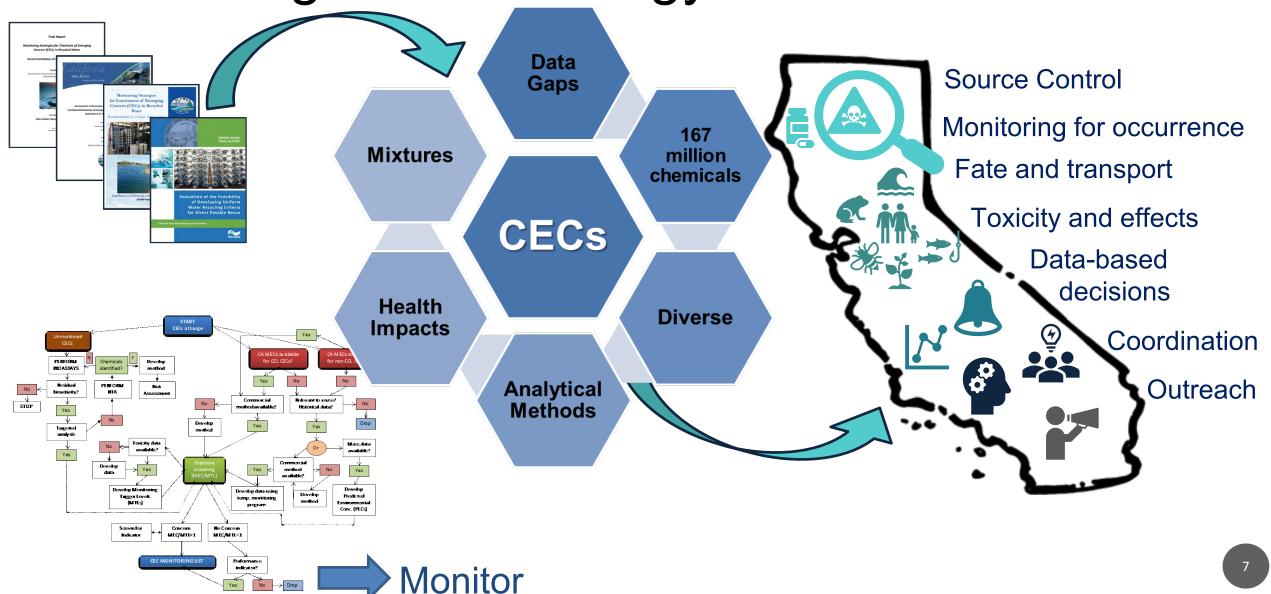

Challenges with Developing a Statewide CEC Management Strategy

Challenges with Developing a Statewide CEC Management Strategy

CEC Program: statewide applicability, flexible, adaptive management

Information Gathering

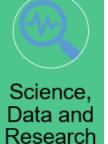

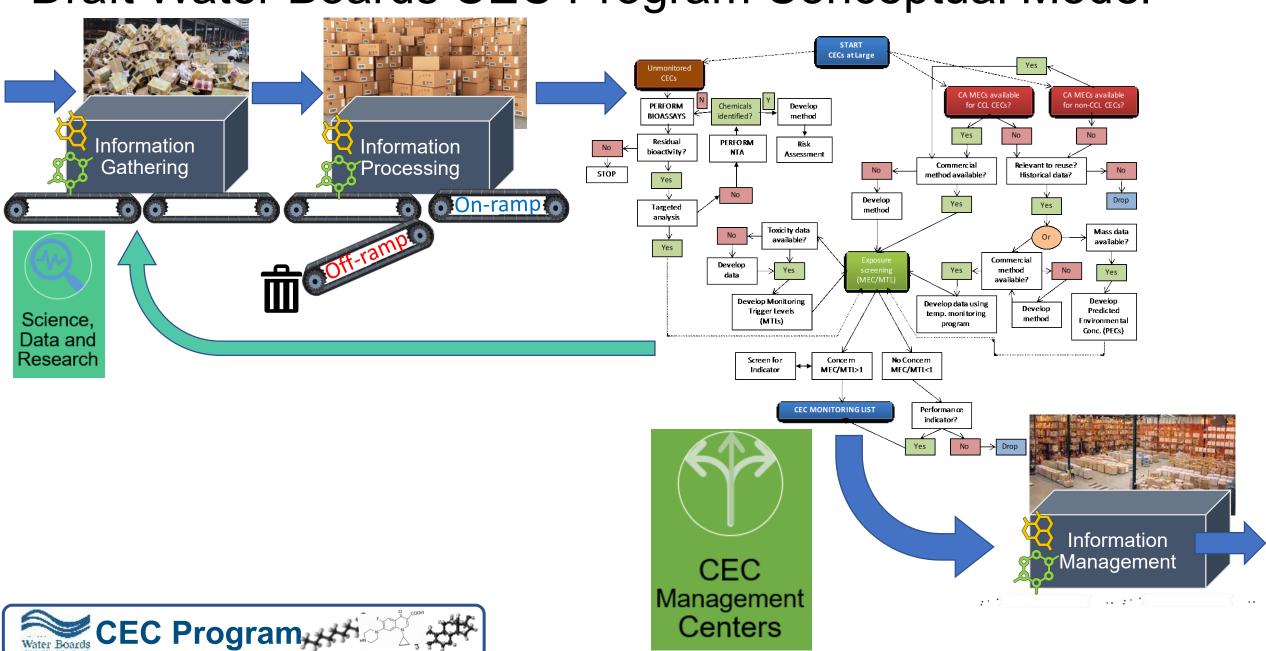

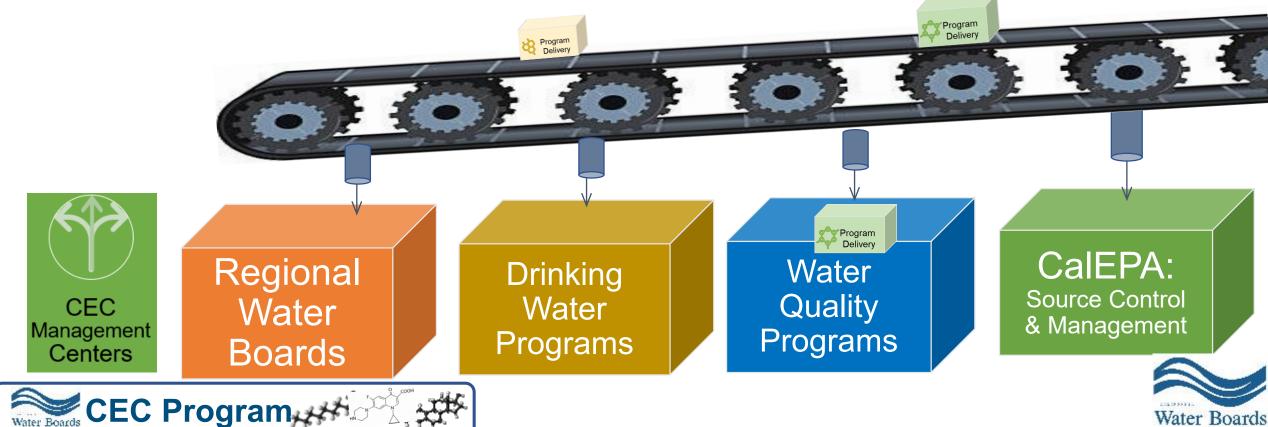

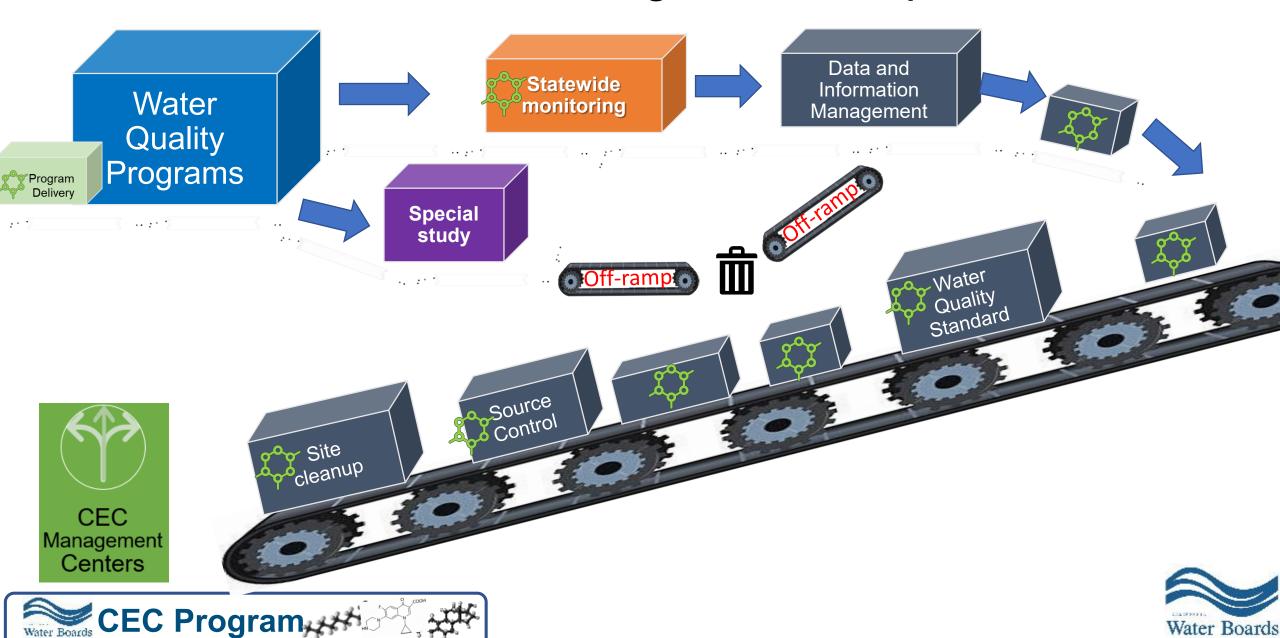

Water Boards

Water Boards

2020 Aquatic Ecosystems Panel Charge

Update risk-based framework for CEC prioritization

Consider classes of CECs rather than individual compounds, including data-poor classes of CECs

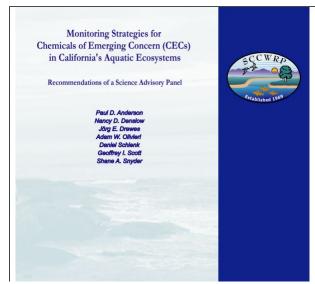

Identify sources, pathways, and rates of inputs of CECs to marine, estuarine, and freshwater ecosystems

Evaluate known and unknown biological effects of CECs, including effects on sentinel species

Identify how state agencies can better address classes of CECs in the environment through implementation of the risk prioritization framework

Implementation of Panel Recommendations

Panel's Recommendations

CEC monitoring requirements in permits

Research and voluntary monitoring

Program Development
