

AGENDA

- Call to order and introductions
- Approve minutes from last meeting
- Review of draft workplan
- Update from CASA
- Questions and comments from the public

Ceriodaphnia dubia Study Draft Workplan

Stakeholder Committee Meeting #3
March 24, 2021

Developing the study workplan

- ✓ Oral presentation to Stakeholder Committee
- ✓ Oral presentation to the Expert Science Panel
- **Review of written workplan by Stakeholders**
- Review of written workplan by the Expert Science Panel
 - Meeting scheduled for April 12, 11 a

Goal for today:

Refine the draft workplan that will be sent to the Expert Science Panel

Overview of workplan

1. Create a governance structure
2. Analyze historical data and lab techniques to identify sources of variability
3. Conduct dose-response testing to optimize lab technique(s)
4. Evaluate the revised lab technique guidance via split-sample testing
5. Produce a final report with recommended guidance

Overview of workplan

- Emphasis on the methods to achieve Step 2 and identify sources of variability
 - Lab methods and historical data to collect from participating laboratories
 - Procedures to extract, store and analyze data and assess
- No detailed approach for split sample testing, and subsequent tasks
 - Amount of additional funding will dictate the scope of work and number of samples to test
 - Steps 3 and 4 study design will be developed based on the results of Step 2
- An amended workplan will be produced after analyses of historical data
 - Stakeholders will review this workplan

Key Dates

- March 29: Deadline for Stakeholders to submit written comments
- April 12: Expert Science Panel Meeting
- April 26 (TBC): Approval of workplan by the Science Panel
- May 1: Deadline to submit written workplan to the State Water Board
