

PREVIOUSLY PROPOSED TOPICS FOR YOUR DECEMBER MEETING

- **Physical-biogeochemical modeling**
 - Model results that quantify the extent to which nutrient input reduction affects acidity and hypoxia in coastal shelf waters
 - Biological thresholds with which to interpret those results
- **What we know about microplastics in wastewater effluent**
 - Summary of research being done by others
- **Status of CEDEN**
 - Would most appropriately be given by State Board staff
- **Planning for SCCWRP's 50th Anniversary celebration**
