

# PROPOSED AGENDA ITEMS

- **You asked for a Microbiology theme**
  - New source identification methods we are developing to identify sewer exfiltration, including update on Regional Board 9 investigative order
  - Results from our antibiotic resistance bacteria in wastewater outfalls study
  - Update on the shellfish study to assess whether existing SHEL bacteria standards are appropriate in Newport Bay
  - Update on the comparison of enterococcus and coliphage as indicators of fecal contamination
- **There was also a request at your March meeting for an update on San Diego Water Board's proposed Basin Plan amendment**
  - Specific interest about their incorporation of biological objectives
