

California Stormwater Quality Association

Collaboration with SCCWRP

CALIFORNIA STORMWATER
QUALITY ASSOCIATION®

CASQA's Vision for Stormwater

Manage stormwater as a vital component of California's water resources in a sustainable manner, support human and ecological needs, protect water quality, and enhance and restore our waterways

* Available on CASQA's Website *

Vision Principles

- **Principle 1: Implement Projects / Programs**
 - Sustainable stormwater management uses runoff as a resource, protects water quality and beneficial uses, and efficiently minimizes pollution.
- **Principle 2: Establish Framework**
 - Policies, regulations, guidance, training, and funding need to support sustainable stormwater management.
- **Principle 3: Public Awareness / Support**
 - Public awareness, understanding, and appreciation of the value of stormwater is essential to sustainable stormwater management.

Collaboration Opportunities

- Principle 1:
 - Stormwater Capture
 - BMPs / LID / Green Infrastructure
 - Water Resiliency / Climate Change / Post-Fire Response

* Collaboration with POTWs and other water sectors*

Collaboration Opportunities

- Principle 2 (Water Quality Priorities):
 - Bacteria
 - Trash
 - Biointegrity / Biostimulatory Substances
 - Current Use Pesticides

* Collaboration with POTWs and other water sectors*

Working together we can make a difference!
