

SCCWRP
Annual Research
Agenda

Commission Presentation, June 2025

SCCWWRP Has Two Forms of our Research Plan

- **Executive Summary** that provides an overview of all eight research themes into one readable document
 - Primary communication document
- **Detailed “20 pagers”** for each individual research theme
 - Outcome of our all-day intersessional planning meetings with CTAG
 - Describes our 5- to 10-year shared research vision
 - Revisit and renew every three years
- **The Executive Summary** is what is in front of you today for Commission approval

What's in the Executive Summary?

- Introduction to SCCWRP, and who we are doing research for
- Description of each Research Theme
- Overarching priority projects highlighted from our research themes
 - Details are in the 20-page vision documents
- Reminder: Our Research Planning doesn't end with the Executive Summary, or even the 20-pagers
 - We have ongoing project interactions with CTAG

What's New and Different This Year?

- Closing out large portions of the Bight Regional Monitoring Program
- Investments in Ocean Modeling from Expert Panel Recommendations
- Effectiveness of structural and non-structural stormwater BMPs
- Extending ecohydrology risk beyond a single location or a single species
- Completing our joint CTAG-SCCWRP project
 - Initiating a new joint project

Schedule of CTAG Intersessionals

- **Eutrophication (Feb 2025)**
- **Microbial Water Quality (Nov 2024)**
- **Climate Resiliency (Apr 2024)**
- **Next up: Stormwater, Risk assessment, CECs**
